ARB’s engineers have designed and developed a Summit Bar to suit the GX and GXL models of the recently released MY16 200 Series.

Whilst chassis mounts have been retained from the pre facelift model, due to the change in headlight, bonnet, guards and bumper all other components have specifically been designed and developed for the MY16 200 Series.

A separate bar is being developed for the VX and Sahara models in the MY16 range of the 200 Series. Additional features including front parking sensors, 4 Camera Multi Terrain Monitor and Radar Cruise control are fitted to these depending on vehicle specification. Separate New Product Release information will be distributed when available.
Protection & Styling Characteristics:

- Vehicle specific design for the 200 Series GX and GXL.
- Registered design of styling and design components.
- Durable steel construction for maximum protection.
- Incorporates ARB’s renowned multi fold upswept and tapered wing design for optimum strength and approach angle.
- 30mm radius on wings and centre section.
- Engineered, air bag compatible mounting system secures to the chassis via high tensile bolts.
- Split pan design for maximum strength and airflow.
- 2 piece grill design for split pan.
- Extensive protection panels on centre and either side.
- 60.3mm outer frames and centre cross bar.
- Formed cover strap.
- Pressed form top pan and aluminium (powder coated black) winch cover panel.
- Twin Hi-Lift jack points located beneath each buffer for optimum strength.
- Durable two piece buffers including cover strap intersection caps.
- Will accommodate Warn, Magnum, Bushranger and Smittybilt low mount model electric winches up to 12,000lb (not Warn M12,000).
- Provision to accommodate ARB Intensity LED’s and a range of Bushranger and IPF lights.
- Provision for optional ARB fog light kit part no 3500590.
- Includes ARB LED Indicator and Clearance light.
- Two aerial brackets located on the top of the centre frame.
- Bar adds approximately 210mm to the overall length of the vehicle.
- Approximate weight of the bar, chassis mounts and fitting kit is 88kg. Approximately 22kg is removed from the vehicle for fitment of the bar.
- Zinc rich primer for additional corrosion resistance.
- Finished in satin black powder coat.
Cover Strap:

A 62.6mm press formed cover strap is featured on ARB’s Summit Bar for the MY16 200 Series. The press form adds strength and visually the wider cover strap suits the larger diameter tube and 30mm radius of the pans. The intersection of the cover strap and buffers is covered by a cover strap intersection cap.

Fog Lights:

ARB’s new fog light surround is featured in the ARB Summit Bar for the MY16 200 Series.

ARB Fog Light part # 3500590 and ARB Auxiliary Fog light loom part # 3500530 are required if fitting the ARB Fog Light option. A clear fog light cover has been developed separately under part # 3500680.

The fog light surround will be supplied in a natural black finish to complement the buffer design. Colour coding is available as an option under part # CC19 COLOUR CODE FOG LIGHT SURROUND.

Antenna Mounts:

Two aerial mounts are welded to the centre cross tube to allow fitment of UHF/AM radio and mobile phone aerials/antennas.

Synchro pulse controlled welding is used for a visually appealing weld with seam quality that is comparable with that of a TIG-weld.
Led Clearance Light / Turn Signals:

Press form apertures in each wing are provided to fit ARB’s LED indicator / turn signal.

Hi-Lift Jack Points:

Hi-Lift Jack points are located directly below the buffers. The Hi-Lift jack point is welded directly to the upright on either side and is designed to prevent the Hi-Lift jack from interfering with the buffer.

Pressed Form Top Pan And Winch Cover:

ARB’s Summit Bar range features a pressed form top pan that adds strength to the pan whilst allowing for the winch cover panel to be recessed for an integrated appearance.

A 4mm aluminium press formed winch cover panel is supplied with the Summit Bar for the MY16 200 Series for when no winch is fitted.

The cover is supplied in a satin black powder coat finish with the option to colour code (included in bar colour coding charges).
Driving Light Mounting:

The press formed top pan includes laser cut holes for fitment of a range of compatible driving lights including ARB Intensity, Bushranger and IPF 800, 808 and 900 Series lights.

Pinning holes for ARB Intensity lights are included.

Buffers, Split Pan Grill And Fog Light Surround:

ARB’s Summit Bar range features two piece buffers, split pan grill and ARB’s Fog Light Surround that accepts fitment of ARB Fog Light part # 3500590. All three components are designed to integrate with each other and the bar design.

The upright section of the two piece buffer has a style line to complement the fog light surround. The intersection of the cover strap and buffer is covered by a cover strap intersection cap to neatly finish the press formed cover strap.

To provide access to winch clutch handles and to assist with valuable air flow to the radiator the split pan has a two piece grill for an integrated appearance.

An access door on the left hand side allows access to winch clutch handles. This door also overcomes clutch lever access when larger lights are fitted to the press form top pan.
Winch Model Fitment:

The ARB Summit bar for the MY16 200 Series fits the following winches:

- Warn M8000, XD9000, XP9.5, XDC 9.5, 12.0XE (not M12000)
- Warn ZEON 8, 8-S, 10, 10-S & 12
- Warn ZEON Platinum 10, 10-S & 12
- Warn Magnum 8, 10 and 12
- Smittybilt Gen 2 X20 10K
- Bushranger DV-9TH, DS-9.5TH, Seal 9.5TH and DV-12TH

Due to the orientation of the Warn M12000 (clutch handle on the right hand side) winch this winch is not recommended fitment to the Summit bar. ARB’s Commercial bar has been designed to accept the Warn M12000 winch.

The Summit Bar range has an integrated control box mount that recesses the control box lower in the pan. Different mount holes and control box mount brackets are provided to suit different winches. Winch Fitting Kit instructions have further information as to which mount hole or bracket is suitable.

Please note that not all winches on the market will have mount holes pre-drilled. Additional fit kits are required depending on the winch being fitted:

- 3500270 WINCH INSTALL KIT SUMMIT BAR. This kit includes a flip up number plate bracket.
- Warn ZEON and ZEON Platinum fitment require Warn part No W89966 Short Wiring Kit.
- Warn ZEON Platinum fitment may require Warn part No W94288 Enhanced Signal Kit.
- Winches fitted with a hawse fairlead will require part No 3500600 Hawse Fairlead Spacer Kit.
