DATE:
June 2014

DESCRIPTION:
Sahara Bar

APPLICATION:
2014 Prado GX & GXL

PART NO.:
3921800

PRODUCT GROUP:
011 - Sahara Bars

BARCODE:
9332018028358

FITTING:
4 Hours

AVAILABILITY DATE:
July 2014

PRODUCT SPECIFICATION

DESIGN & DEVELOPMENT:

The late 2013 GX/GXL Prado 150 Sahara Bar uses the mount brackets developed for the Deluxe bars to clear the lower grill assembly and lower headlight assembly.

To ensure that approach angles are maintained for off road performance the bar has been kept as high as possible. Due to this the bottom section of the clearance light is below the top of the wings. To reduce glare UV stable polyurethane films with an automotive grade 3M adhesive backing are supplied.

The ARB Sahara Bar for the Prado 150 incorporates ARB’s new LED Combination Light (clearance and turn signal) as standard. Please refer to the separate New Product Release for the LED Combination Light for full details.
PROTECTION & STYLING CHARACTERISTICS:

- Vehicle specific design to complement the 2014 Prado GX and GXL models
- Durable steel construction for maximum protection
- Incorporates ARB’s renowned multi fold upswept and tapered wing design for optimum strength and approach angle
- Split pan design for maximum strength and airflow
- Superbly engineered, airbag compatible mounting system
- Extensive under protection panels on centre and both wings
- The bar adds approximately 200mm to the overall length of the vehicle (including the buffers)
- Optional polished aluminium top centre tube
- Equally suited to winch and non winch applications and includes top pan winch cover panel
- Will accommodate Warn, Bushranger and Smittybilt low mount mid frame electric winches up to 10,000lbs
- Twin Hi-Lift jack points located in the pan of the bar
- Provision to accommodate a range of IPF and ARB Driving Lights
- Injection moulded fog light / turn signal surrounds
- UV stable polyurethane film with an automotive grade 3M adhesive backing to reduce glare from the OE park light
- LED clearance light / turn signals
- Durable urethane buffers
- Two aerial brackets located on the optional polished aluminium tube and on centre section of bar when no tube fitted
- Finished in a hard wearing millennium grey powder coat with the added option of colour coding to individual vehicles
- Fitment confirmed with OE headlight protectors

DRIVING LIGHT MOUNTS:

Sahara Bar includes laser cut holes in the top of the centre pan for fitment of a range of compatible driving lights such as ARB Intensity and IPF 808, 800 and 900 series lights.

Note: Pinning holes for ARB Intensity Lights included.
WINCH MODEL FITMENT:

014 Prado GX/GXL Sahara Bar fits the following winches:
- Warn M8000, XD9000, Xp9.5 and XDC 9.5
- Warn ZEON 8, 8-S, 10 and 10-S
- Magnum 8000 and 10,000
- Smittybilt X20 10K
- Bushranger DV-9TH, DS-9TH and Seal 9.5TH

Additional fit kits are required depending on the winch to be fitted:
- Warn ZEON fitment requires Part No W89965 Short Wiring Kit and either 3500810 ZEON Wire Rope Fit Kit or 3500620 ZEON Synthetic Rope Fit Kit
- Hawse Fairlead Spacer Kit Part No 3500600 required if winch has synthetic rope
- Smittybilt Solenoid Bracket Part No 3500580 required if fitting a Smittybilt winch

AERIAL MOUNTS:

Two aerial mounts are welded to the centre aluminium tube to allow fitment of UHF/AM radio and mobile phone aerials / antennas. Aerial mount holes also included in the centre top pan if no centre tube is fitted.

FOG LIGHTS:

ARB Fog light surrounds incorporating recessed LED clearance / turn signal light assemblies are standard and can be upgraded to include the optional ARB Fog Light Kit part no 6821201.

GX models require ARB Auxiliary Lighting Loom Part no 3500440.

GXL models also require ARB Auxiliary Lighting Loom part no 3500440 due to the factory fog light loom being insufficient to support the 55W bulbs used in the ARB fog light.
HI-LIFT JACKING POINTS:

Each bar comes standard with two reinforced Hi-Lift jacking points fitted to the centre pan.
