PRODUCT RELEASE

Date: December 2016
Description: ARB Summit Side Rails and Protection Steps
Application: Part Toyota Landcruiser 76 Series Wagon
No./Barcode: Refer table below
Product Group: 020 – Side Rails/Steps
Fitting: Refer table below
Availability Date: February 2016

Product Specification

DESIGN & DEVELOPMENT:

ARB's recently released large tube bar for the 70 Series has had Summit Side Rails and steps developed to suit the 76 Series wagon. Protection step equivalents have also been developed using the 60.3mm tube and the new style anodised step extrusion.

The design registered clamp offers a neat and practical solution to connect the 60.3mm side rail to the upright of the Large Tube 70 Series Bar (part # 3412500). Two spacers are included in the fitting kit to allow for variances in bar to chassis tolerances. The ARB branded cover also allows for adjustment in the side rail to upright positioning.

New steps and rails are still under development for the Troop Carrier. A separate product Information Bulletin will be distributed for these.

PROTECTION & STYLING CHARACTERISTICS:

- Vehicle specific design for the 76 Series wagon.
- Registered design of styling and design components.
- Durable steel construction for maximum protection.
- Side rail designed for flared models fitted with part # 3412500 large tube flared bar.
- Anodised step extrusion featuring ridges for additional grip.
- Finished in satin black powder coat with the option to colour code to vehicle colour.
- Template provided for drilling of the central mount bolt.
- Supplied with corrosion resistant fasteners.
- Approximate weight including fasteners
  o 76 Series Side Rail and Step 44kg.
  o 76 Series Protection Step 30kg.
ANODISED STEP EXTRUSION:
Silver anodised extruded aluminium sections is used on the large tube side rails and steps for the 70 Series.

Extrusion for the complete Side Rail and Step is supplied as separate left and right handed sections. Extrusion for the protection step has the same front and rear profiles so can be fitted to either side.

SIDE RAIL CLAMP:
The recently released side rail clamp slides over the side rail, allowing for fitment of aluminium spacers to adjust for varying vehicle chassis to bar fitment tolerances.

An exploded view of the components is below.
