Product Release

Date:
December 2016

Description:
ARB Roof Racks

Application:
Toyota Landcruiser 200 Series MY16

Part No. & Barcode:
Refer table below

Product Group:
043 – ARB Roof Rack F/Kits & Accs

Availability Date:
February 2017

Product Specification

Design and Development:

Toyota’s MY16 200 Series Landcruiser saw a number of minor changes to the sealing of the captive points in the roof cavity of the vehicle. ARB’s engineers have developed a simple additional kit to enable existing ARB Roof Rack mount kits to be installed on the MY16 200 Series.

Sealing of the roof rack mount points is critical on the 200 Series as the captive points are open to the roof cavity of the vehicle. The washer kit allows roof racks to be removed if required without the requirement for silicone or other sealants.

The washer kit includes 16 specific M8 sealing washer sleeves and 16 M8 sealing washers developed specifically for the 200 Series as an off the shelf solution is not readily available. If used for fitment of the 1850mm or 1100mm racks not all the washers are used.
