Product Specification

When your vehicle is stuck in knee deep mud, bogged in the desert during sweltering temperature or having to recover your mate off the beach, reliability, performance and durability of your recovery gear is paramount. You can rely on ARB recovery products for your vehicle's safety.

Introducing the ARB RK12 Weekender Recovery kit. With a slim design, this entry level kit can be easily stored in the car or ARB Outback Solutions drawers, keeping vital vehicle recovery equipment on hand should the need arise.

Included in the kit is the high-quality ARB 8,000 kg vehicle recovery strap (ARB705 Snatch strap which has been a winner of many recovery strap tests throughout Australia and the world), two type “S” Galvanized 4.75t rated shackles, one set of cow grain leather palm with cow split leather back gloves and a rugged PU coated cotton canvas recovery bag with dual internal pockets bathed in the ARB topographic styling.

The Dual compartments provide space for a recovery dampener (sold separately) to further complement your weekend recovery setup.

When selecting a vehicle recovery strap (Snatch strap) it is recommended that the minimum breaking strength of the strap should be between 2 and 3 times the gross vehicle mass (GVM) of any vehicle it is used with, and that the strap must be suited to the GVM of the lighter of the 2 vehicles used in the recovery process. The 8,000kg recovery strap is therefore suitable for vehicles with a GVM between the range of 2,650kg - 4,000kg encompassing all 4wd Light Commercial Vehicles and 4wd Wagons (excluding Iveco Daily & OKA).
