DATE: 
June 2014

DESCRIPTION: 
UVP Set

APPLICATION: 
LC 200 Series 2007 on

PART NO.: 
5415100

PRODUCT GROUP: 
031 – ARB Under Vehicle Protection

BARCODE: 
9332018029553

FITTING: 
1 Hour

AVAILABILITY DATE: 
August 2014

PRODUCT SPECIFICATION

DESIGN & DEVELOPMENT:

Designed to give protection to vital underbody components including steering, engine sump, transmission and gearbox. ARB Under Vehicle Protection Panels are laser cut, press formed and folded to provide superior strength.

The 2007 on 200 Series Under Vehicle Protection Panels consist of four carefully designed panels. The front, sump and transmission panels bolt directly to the chassis and provide continuous under vehicle protection from front bar to transmission. The transfer case panel bolts directly to the transfer case.

The Under Vehicle Protection panels will fit with or without an ARB front bar. Fitment has not been confirmed with other bar designs.

Fitment has been confirmed on V8 Turbo Diesel models with and without KDSS. Fitment has not been confirmed on other engine variants.
FEATURES:

- 3mm pressed and folded sheet steel adds more strength than standard folded sheet
- Laser cut sheet steel
- Zinc plated and powder coated in a silver textured finish
- Recessed mounting bolts are protected and easy to remove for vehicle servicing
- All steel components are protected with either powder coat or zinc plating
- Vehicle specific design

NOTE:

While these panels have been engineered for strength and functionality, care and good judgement should be taken when traversing difficult off-road conditions to minimize damage to panels and vehicle.

During servicing when panels are removed ensure fasteners are re-fitted to the correct torque values.

Inspect panels visually on a regular basis. Dirt and foreign matter should be washed out to minimize build up around hot components. CAUTION is required when removing foreign matter with hands while vehicle is hot or running. Replace any components as necessary.
