Date:
December 2017

Description:
ARB Summit Sahara Bar

Application:
Mitsubishi L200/ Triton MQ
2015On

Part No. & Barcode:
Refer Table below

Dimensions and weight:
3946320 - 1985x450x800  55kg.

Product Group:
Refer Table below

Fitting:
4 Hours

Availability Date:
Available to order

Product Specification

Design and Development:

Offering a stylish and practical alternative to the Summit or Commercial bars already available, a Summit Sahara bar has been developed to suit the Australian specification 2015on Mitsubishi L200/ Triton MQ.

The Summit Sahara bar shares a number of features with the Summit bar including press form top pan and winch cover, recessed winch control mount, 30mm wing and pan radius, split pan grill with twin doors for winch and driving light mount access.

As with the majority of ARB Sahara bars the bar is available with or without the optional alloy centre tube. If fitting the optional centre tube, the top buffer section is included in the Alloy Tube Kit. If fitting no tube kit a separate top buffer kit is required. Please refer to the part number table on page 3 for further part number details.

Chassis mounts and bracing, developed for the Australian specification L200/ MQ Triton, have been retained to ensure compatibility with ARB Recovery Points and UVP. Fitment is not suitable to the Thai specification vehicle which has different chassis ends.
Protection and Styling Characteristics:

- Vehicle specific design for the Australian specification chassis L200/MQ Triton.
- Registered design of styling and design components.
- Durable steel construction for maximum protection.
- Incorporates ARB’s renowned multi fold upswept and tapered wing design for optimum strength and approach angle.
- 30mm radius on wings and centre section.
- Engineered, air bag compatible mounting system secures to the chassis via high tensile bolts. Mount system includes chassis reinforcing for 10,000lb winch compatibility.
- Split pan design for maximum strength and airflow.
- 3 piece grill design for split pan.
- Extensive protection panels on centre and either side.
- Pressed form top pan and aluminium (powder coated black) winch cover panel.
- Twin Hi-Lift jack points located beneath each buffer for optimum strength.
- Durable two piece buffers.
- Will accommodate Warn, Magnum, Bushranger and Smittybilt low mount model electric winches up to 10,000lb.
- Provision to accommodate ARB Intensity LED’s and a range of Bushranger and IPF lights.
- Provision for optional ARB Fog light kit part no 3500590.
- Provision for optional ARB Fog light covers part no 3500680.
- Provision for Optional Summit Roller Fairlead Cover part no 3500850.
- Compatible with ARB Recovery Points. Fitment recommended at time of bar fitment.
- Includes ARB LED Indicator and Clearance light.
- Two aerial brackets located on the top of the centre tube. Additional provision on centre pan when no tube kit fitted.
- Bar adds approximately 240mm to the overall length of the vehicle.
- Approximate weight of the bar, chassis mounts, tube kit and fitting kit is 52kg.
- Zinc rich primer for additional corrosion resistance.
- Finished in satin black powder coat.

Buffers, Split Pan Grill and Fog Light Surround:

The Summit Sahara Bar for the L200/ Triton features two piece buffers, split pan grill and ARB’s Fog Light Surround (suits ARB Fog Light part number 3500590). All three components are designed to integrate with each other and the bar design.

The upright section of the two piece buffer has a style line to complement the fog light surround. Sahara Tube kit 5138030 includes the top buffer section. If no tube kit is being fitted part number 5100230 is required.

To provide access to winch clutch handle, driving light mounts and to assist with valuable air flow to the radiator the split pan has a three piece grill for an integrated, OE style appearance.

Fog Lights:

Fitment of ARB Fog light part number 3500590 is optional to the L200/ MQ Triton Summit Sahara Bar. ARB Auxiliary Fog Light Loom part number 3500530 is required if fitting the ARB Fog Light Option.

The fog light surround will be supplied in a natural black finish to complement the buffer design.

A clear fog light cover has been developed separately under part number 3500680.
LED Clearance Light / Turn Signals:

Press form apertures in each wing are provided to fit ARB’s LED clearance light / turn signal.

Pressed Top Pan and Winch Cover:

The top pan of the Summit range of bars feature a press form to add strength and a 4mm aluminium press formed winch cover panel, for when no winch is being fitted.

When fitted the winch cover panel is recessed in the press form top pan to give a level and integrated appearance.

The cover is supplied in a satin black powder coat finish.

Hi-Lift Jack Points:

Hi-Lift jack points are located directly below the buffers. The Hi-Lift jack point is welded directly to the upright on either side and is designed to prevent the Hi-Lift jack from interfering with the buffer.

Antenna Mounts:

Two aerial mounts are welded to the alloy tube to allow fitment of UHF/AM radio and mobile phone aerials/antennas.

When no tube kit is fitted provision is provided on the centre pan for aerials/antennas.
Winch Model Fitment:

The ARB Summit Sahara bar for the L200/ MQ Triton fits the following winches:

- Warn M8000, XD9000, 9.5XP, 9.5XDC
- Warn ZEON 8, 8-S, 10 and 10-S
- Warn ZEON Platinum 10 and 10-S
- Warn Magnum 8 and 10
- Smittybilt Gen2 X20 10K
- Bushranger DV-9TH, DS-9.5TH and Seal 9.5TH

The Summit Sahara bar has an integrated control box mount that recesses the control box lower in the pan. Different mount holes and control box brackets are provided to suit different winches.

Winch fitting kit instructions have further information as to which mount hole or bracket is suitable.

Please note that not all winches on the market will have mount holes pre-drilled.

Additional fit kits are required depending on the winch being fitted:

- 3500720 WINCH INSTALL KIT SUMMIT BAR. This kit includes a flip up number plate bracket.
- Warn ZEON and ZEON Platinum fitment require Warn part No W89965 Short Wiring Kit.
- Warn ZEON Platinum fitment may require Warn part No W94288 Enhanced Signal Kit.

Compatibility with ARB Recovery Points:

If ARB Recovery Points are to be fitted, it is recommended that they are fitted at the same time as bar fitment.

To achieve the 8T rating, the ARB bar chassis mounts are integral to the rigidity of the structure and need to be mounted in conjunction with the recovery points.

Please refer to separate Product Information Bulletin No. 72 for further details on the ARB Recovery Points for the L200/ Triton.
Driving Light Mounts:

The press formed top pan includes laser cut holes for fitment of a range of compatible driving lights including ARB Intensity, Bushranger and IPF 800, 808 and 900 Series lights.

Pinning holes for ARB Intensity lights are included.

Fitment of the AR40 Light bar is not recommended to the Sahara Tube.
