Date: September 2018
Description: Frontier Fuel Tank
Application: Mitsubishi Pajero Sport
Part No. & Barcode: TAD117 9332018059147
Product Group: S02
Fitting: 2 Hours
Capacity: 100 Litres
Availability Date in Europe: upon request

Product Specification

The latest ARB Frontier diesel tank, the TAD117 to suit the Mitsubishi Pajero Sport, will be available in October in Australia.

The 100 litre TAD117 tank replaces the O.E. 65 litre tank, giving an increase of 35 litres over the original factory tank.

This tank is made from a specifically formulated Crosslink Polymer, with a wall thickness of up to 8mm. This means that the ARB Frontier tank is durable and impact resistant. The benefit to you is that it is perfect for off-road applications and is a must have for the Pajero Sport driver thinking about driving long distances.

The TAD117 also comes pre-fitted with hardware, fixtures and fittings, allowing for an easy installation.
Features:

- Made from durable and impact resistant Crosslink Polymer material.
- One-piece body construction.
- Negligible impact on vehicle ground clearance.
- Designed to take up voids under the vehicle.
- Easy and fast installation.
- No rusting or corrosion of the tank body.
- Allows for flexing of the vehicle's chassis.
- Individually pressure tested.
- Supplied with ARB strap mounting kit.
- Made in Australia.

Strap Mounting Kits:

- The strap mounting provides a solution that is easy to install.

- Steel mounting straps attach to the underside of the vehicle and provide a non-rigid mounting system, which allows for movement of the tank within the straps.

- The rubber coated steel mounting straps have been designed to meet the extra load requirements and attach to the vehicle chassis, keeping the tank secure and allowing fast and easy installation.
