**Product Specification**

**Design and Development:**

As per Product Information Bulletin 719, Ford and Mazda’s exhaust heat shield for their recent recall for safe off-road vehicle operation and avoidance of potential fire hazard, is incompatible with ARB Under Vehicle Protection part # 5440200. A supplementary Exhaust Heat Shield Kit has been developed that replicates the coverage of the Ford and Mazda recall panels.

Fitment of the Exhaust Shield Kit PN 5440170 requires ARB UVP 5440200 to be fitted. It is not designed to be fitted as a stand alone Exhaust Shield Kit. Note that the Exhaust Shield Kit is a shield kit only and does not offer the same impact protection as the ARB UVP system it attaches to.

Note these Exhaust Shield panels have been engineered for protection and functionality, care and good judgement should be taken when traversing difficult off-road conditions to minimize damage to panels and vehicle.

During servicing when panels are removed ensure fasteners are re-fitted to the correct torque values.

*Note Shield kit is the black powdercoated panels*
Inspect panels and mounting points visually on a regular basis. Dirt and foreign matter should be washed out to minimize build up around hot components. CAUTION is required when removing foreign matter with hands while vehicle is hot or running. Replace any components as necessary. This service can be performed by your local authorized ARB Stockist.

Fitment of the supplementary kit can be performed with the ARB UVP PN 5440200 still in place on the vehicle if required or as part of a complete fitment of the 5440200 UVP and 5440170 Exhaust Shield Kit. No modifications are required to the UVP kit for fitment.

The supplementary Exhaust Shield Kit (part number 5440170) includes:

- 2 x DPF shield panels manufactured from laser cut and folded 1.6mm sheet steel finished in satin black powdercoat
- 1 x 3mm front cross member mount
- 1 x 2mm middle cross member mount
- fasteners
- fitting instructions
